At Altronic LLC, we apply our core values of integrity, personal accountability, and relentless pursuit of product excellence in our daily business activities with customers and suppliers around the world. Consistent with our core values, Altronic recognizes that we have a responsibility not to support or contribute to the violence and human rights violations associated with the mining of certain minerals in Central Africa described as the “Conflict Region” or “Conflict Mines”.

Electronic components contain various metals – including tantalum, tin, tungsten and gold. These four metals are sourced worldwide, including the Eastern provinces of the Democratic Republic of Congo (DRC).

As a privately held company, Altronic is not under the jurisdiction of the Dodd-Frank Act nor are we required to report to the SEC. Altronic supports the 2010 Dodd-Frank Act that promotes transparency and consumer awareness regarding the use of “Conflict Minerals” and seeks to cut direct and indirect funding of the armed groups engaged in conflict and human rights abuses in the Conflict Region.

Altronic does not directly purchase any Conflict Minerals from any source and does not knowingly procure any product containing Conflict Minerals from the Conflict Region.

To the extent that Altronic products may include the products that contain “Conflict Minerals” that are necessary to the functionality or production of the product, Altronic is committed to working with our supply chain to increase transparency regarding the origin of minerals contained in products.

We encourage our suppliers to adopt similar policies and systems with respect to Conflict Minerals and drive those efforts throughout their supply chain to ensure that the specified metals are being sourced only from mines and smelters outside the “Conflict Region” or mines and smelters within the Conflict Region which have been certified by an independent third party as “conflict free”.
